

EVA TSATSI

Cloud Engineer | Microsoft Certified: Azure Developer Associate (AZ-204)

Johannesburg, South Africa | 081 547 1534 | evatsatsi18@gmail.com | linkedin.com/in/eva-tsatsi-7475011a2 | github.com/Evesprogram

PROFESSIONAL SUMMARY

Software Engineering graduate (NQF Level 6) and Microsoft Certified Azure Developer Associate (AZ-204) with 10+ years of professional experience spanning operations, QA, and system delivery. Hands-on exposure to Microsoft Azure and AWS, with a working foundation in C#, .NET, SQL, and REST APIs built through real-world application development and testing. Experienced in validating system reliability, debugging across environments, and documenting technical processes. Currently building practical cloud and DevOps skills toward AZ-900 and AZ-400, with a strong track record of fast learning and dependable delivery in fast-paced, high-accountability settings.

CLOUD & TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (App Services, Azure Functions concepts, Azure AD/Entra ID, Storage — AZ-204 certified); AWS (Foundational Knowledge — Cloud Practitioner in progress)

Cloud & DevOps (Developing): Azure DevOps Engineer (AZ-400) — in progress; Git/GitHub version control and CI workflows; infrastructure documentation and change validation

Languages: C#, Python, JavaScript, SQL

Frameworks & APIs: .NET Framework, ASP.NET Core MVC, REST APIs, ADO.NET

Databases: SQL Server, Relational Database Design, Query Optimization

Data & Reporting: Power BI (data cleaning, transformation, dashboarding)

Practices: SDLC, OOP, System Testing & Debugging, Requirements Analysis, Technical Documentation

Tools: Git, GitHub, Visual Studio, VS Code, Windows, Linux

PROFESSIONAL EXPERIENCE

Junior Software Engineer (WIL)

June 2026

4IRI

- Independently designed and built Certiflow360, a full-stack fleet management system for client Potent Conceptuals (Pty) Ltd — delivering both front-end and back-end components as a production-ready system for a live business use case.
- Built a C# WinForms desktop application with a SQL Server backend and live GPS mapping integration, plus a companion Blazor Server web dashboard with real-time KPIs and automated email alerting.
- Delivered a fully functional production system within a short, high-intensity engagement window, demonstrating rapid full-stack delivery under real client constraints and cloud-adjacent infrastructure decisions.

Freelance Software Tester / QA

2026 – Present

Self-Employed

- Executed 100+ structured test cases across live beta environments, identifying 15+ defects prior to deployment and reducing production risk.
- Documented functional, usability, and environment-configuration issues to improve system reliability and deployment readiness.
- Collaborated directly with developers to validate fixes, confirming release readiness before go-live — experience directly applicable to validating cloud deployments and releases.

Junior Software / Systems Developer (WIL)

Nov 2025 – Present

Foci Group

- Supported development, testing, and validation of internal applications within structured SDLC workflows.
- Assisted with system documentation and requirements analysis, building a foundation for infrastructure and environment documentation.
- Gained hands-on exposure to team-based development practices and release processes.

Software Quality Assurer (Internship)

Nov 2022 – May 2023

Edian.io

- Executed manual test cases and logged defects using structured QA processes, strengthening attention to detail in system validation.
- Assisted with system monitoring and debugging, building early experience relevant to production support and reliability.

- Collaborated with developers to improve system stability and performance.

Store Lead – Senior Master Skin Therapist

Sep 2019 – May 2024

Dermalogica South Africa

- Managed daily operations, staff performance, and scheduling in a high-volume, high-accountability environment — transferable to on-call and operational reliability expectations in cloud engineering roles.
- Oversaw inventory control, stock management, and financial/compliance reporting, demonstrating rigor with process and audit standards relevant to cloud governance and cost management.
- Drove process optimization and led team development, reflecting strong ownership and continuous-improvement mindset.

RELEVANT PROJECTS

- College Learning Management System (ASP.NET Core MVC) — Web application with authentication, role-based access control, and CRUD operations using MVC architecture and SQL database integration.
- Student Management System (C#, SQL, Windows Forms) — Desktop application with full CRUD functionality, search, filtering, and SQL Server integration.
- Weather Dashboard (JavaScript, HTML, CSS) — Consumed a real-time third-party REST API (Open-Meteo), implemented dynamic UI, forecasting logic, and local storage.
- Power BI Dashboard (Techbridle Foundation) — Performed data cleaning and transformation and built interactive dashboards for reporting and insights.

EDUCATION

NQF Level 6 – Software Engineering | CTU Training Solutions | Completed June 2026

NQF Level 4 – Systems Development | CTU Training Solutions | 2023

National Senior Certificate (Matric) | Completed 2009

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Certified: Microsoft Certified: Azure Developer Associate (AZ-204)

In Progress: Microsoft Azure Fundamentals (AZ-900) · AWS Cloud Practitioner · Azure DevOps Engineer (AZ-400)

Bootcamps: Techbridle Foundation – Full-Stack Development Program (Feb–Sept 2026): React, Python, C#/.NET Core API Development, SQL/NoSQL · FNB App Academy – Full Stack Development · Agile Coach Certificate (Udemy)

LANGUAGES

English (Fluent), Setswana, Sesotho, Zulu
