

EVA TSATSI

Software Developer | C# • .NET • SQL • ASP.NET Core MVC

Johannesburg, South Africa | 081 547 1534 | evatsatsi18@gmail.com | linkedin.com/in/eva-tsatsi-7475011a2 | github.com/Evesprogram

PROFESSIONAL SUMMARY

Software Engineering graduate (NQF Level 6) with hands-on development experience in C#, .NET, SQL, and ASP.NET Core MVC, built across desktop and web applications with full CRUD functionality, authentication, and database integration. Brings a strong quality-first mindset from over a decade in QA, testing, and operations, translating into fewer defects, cleaner debugging, and more reliable releases. Comfortable across the SDLC — from requirements analysis and OOP design through implementation, testing, and documentation. Microsoft Certified: Azure Developer Associate (AZ-204), with growing exposure to cloud-native development and REST APIs. Adaptable, detail-driven, and committed to writing maintainable, well-tested code.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, SQL

Frameworks & Web: .NET Framework, ASP.NET Core MVC, HTML5, CSS3, JavaScript (DOM), REST APIs

Databases: SQL Server, ADO.NET, Relational Database Design, Query Optimization

Cloud: Microsoft Azure (AZ-204 certified), AWS (Foundational Knowledge)

Software Engineering: OOP, SDLC, Unit & System Testing, Debugging, Requirements Analysis, Code Review Support

Data & Analytics: Power BI (data cleaning, transformation, dashboarding)

Tools & Practices: Git, GitHub, Visual Studio, VS Code, Agile, Windows, Linux

RELEVANT PROJECTS

College Learning Management System — ASP.NET Core MVC

- Built a full-stack web application implementing authentication, role-based access control, and CRUD operations following MVC architecture.
- Designed and integrated a relational database layer to support multi-role user workflows (students, instructors, admins).

Student Management System — C#, SQL, Windows Forms

- Developed a desktop application with complete CRUD functionality, search, and filtering against a SQL Server backend.
- Structured data access and UI layers to keep business logic decoupled from presentation.

College Management System — C#, Windows Forms

- Designed a multi-form desktop application to manage student records and administrative data across linked forms.

Teller Application — C#, Windows Forms

- Simulated end-to-end transactional workflows, including data validation and state handling across multi-step processes.

Weather Dashboard — JavaScript, HTML, CSS

- Integrated a live third-party REST API (Open-Meteo) with dynamic UI rendering, forecasting logic, and browser local storage.

Power BI Dashboard — Techbridle Foundation

- Performed data cleaning and transformation, then built interactive dashboards to support reporting and decision-making.

PROFESSIONAL EXPERIENCE

Junior Software Engineer (WIL)

June 2026

4IRI

- Independently designed and built Certiflow360, a full-stack fleet management system for client Potent Conceptuals (Pty) Ltd — delivering both front-end and back-end components as a production-ready system for a live business use case.
- Built a C# WinForms desktop application with a SQL Server backend and live GPS mapping integration, plus a companion Blazor Server web dashboard with real-time KPIs and automated email alerting.
- Delivered a fully functional production system within a short, high-intensity engagement window, structuring both the data access layer and UI to keep business logic decoupled and maintainable.

Junior Software / Systems Developer (WIL)

Nov 2025 – Present

Foci Group

- Support the development and testing of internal applications, contributing to feature implementation and defect resolution.

- Assist with system validation, technical documentation, and requirements analysis within structured SDLC workflows.
- Work within a team-based development environment, gaining exposure to code review, version control, and release processes.

Freelance Software Tester / QA

2026 – Present

Self-Employed

- Executed 100+ structured test cases in live beta environments, identifying 15+ defects prior to deployment.
- Worked directly with developers to reproduce issues, validate fixes, and confirm release readiness — building a strong understanding of how code decisions affect downstream stability.
- Documented functional and usability issues clearly enough to accelerate developer triage and resolution.

Software Quality Assurer (Internship)

Nov 2022 – May 2023

Edian.io

- Executed manual test cases and logged defects using structured QA processes across active development cycles.
- Collaborated with developers to debug issues and improve system stability and performance.
- Assisted with feature validation ahead of release, developing an early eye for edge cases and regression risk.

Store Lead – Senior Master Skin Therapist

Sep 2019 – May 2024

Dermalogica South Africa

- Managed daily operations and staff performance in a high-volume environment, developing strong prioritization and problem-solving skills under pressure.
- Improved operational efficiency through process optimization, and maintained rigorous compliance and audit standards.

Instructor Coordinator (Volunteer)

Jan 2022 – Jan 2023

Uzukhanya Academy NPO

- Taught foundational programming and C# basics to learners, reinforcing core computer science concepts through explanation.
- Coordinated structured learning sessions and student support activities.

EDUCATION

NQF Level 6 – Software Engineering | CTU Training Solutions | Completed June 2026

NQF Level 4 – Systems Development | CTU Training Solutions | 2023

National Senior Certificate (Matric) | Completed 2009

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Certified: Microsoft Certified: Azure Developer Associate (AZ-204)

In Progress: Microsoft Azure Fundamentals (AZ-900) · AWS Cloud Practitioner · Azure DevOps Engineer (AZ-400)

Bootcamps: Techbridle Foundation – Software Development Bootcamp (2026) · FNB App Academy – Full Stack Development · Agile Coach Certificate (Udemy)

LANGUAGES

English (Fluent), Setswana, Sesotho, Zulu
